

Henkel of America - Salt Lake City

TVS Pro Project

Henkel operates worldwide with leading innovations, brands, and technologies in three business areas: Adhesive Technologies, Beauty Care, and Laundry & Home Care. They reached out to T.V.S. Pro looking for a way to monitor production lines in their manufacturing plants and wanted to see live video feeds of the lines and machine status.'

A total of 8 monitors were installed. Four 65" monitors were installed along the production lines on support poles by using a custom mounting adapter. Additionally, four 55" monitors were installed in the central monitoring area on the side of their catwalk bridge. 6 NUC mini PCs were installed as sources.

Key AV Equipment:

Panasonic TH-55SQ1 4K LED Professional Displays
Panasonic TH-65SQ1 4K LED Professional Displays
NUC mini PCs

T.V.S.Pro Team

AV Consultant: Brent Parker
