

BYU-Idaho Advising Center

TVS Pro Project

Brigham Young University - Idaho wanted a digital signage video wall in their advising center to display brief messages and animations along with real student progressions to their careers as alumni. The wall needed to be 165" wide (measured diagonally). We installed a Planar Clarity Matrix G3 LCD Video Wall System which was comprised of 9 x 55" displays configured in 3 x 3, along with a Brightsign 4K digital media player that they would use in conjunction with a local PC which they provided. For sound, 6 Extron pendant speakers were installed near and above the display. All would be used with an Extron control device.

Owner: BYU-Idaho

AV Consultant: Brent Parker

AV Project Manager: Dave Begay

Lead Installer: Alex Nisbet

Key AV equipment:

Planar Clarity Matrix G3 LCD Video Wall System (9 x 55" 3x3)

Brightsign 4K Digital Media Player

6 Extron pendant speakers
